

**INCIDENT MANAGEMENT SITUATION REPORT
WEDNESDAY JUNE 11, 2003 - 0530 MDT
NATIONAL PREPAREDNESS LEVEL 2**

CURRENT SITUATION:

Initial attack activity was light nationally with 87 new fires reported. One new large fire was reported in the Western Great Basin. Very high to extreme fire indices were reported in Alaska, Arizona, California, Colorado, Nevada, New Mexico, Oklahoma, Texas and Utah.

SOUTHWEST AREA LARGE FIRES:

THOMAS, Apache-Sitgreaves National Forest. A Type 2 Incident Management Team (Kvale) is assigned. This fire is burning in mixed conifer and aspen forest 16 miles south of Alpine, AZ. Active fire behavior was observed yesterday. Crews continue to construct fireline and conduct burn out operations.

TEN COW, Gila National Forest. This fire is burning in ponderosa pine, pinyon pine, juniper and grass 32 miles southeast of Reserve, NM. No new information was reported.

DRY LAKES COMPLEX, Gila National Forest. A Fire Use Management Team (Rath) is assigned. This lightning caused Wildland Fire Use complex, comprised of the Dry Lake, Sycamore and Moonshine fires, is 27 miles northwest of Silver City, NM. The complex is being managed to accomplish resource objectives. Minimal fire activity was observed in pinyon pine, ponderosa pine and grass. Resources will continue to support other Fire Use and suppression incidents on the forest.

MORMON, Coconino National Forest. The fire is burning in pinyon pine 19 miles southeast of Flagstaff, AZ. This fire is in confinement status. No new information was reported. This will be the last report unless new information is received.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD
THOMAS	AZ	ASF	3,765	5	UNK	493	16	6	5	0	1.3M

MORMON	AZ	COF	300	0	6/20	1	0	0	0	0	2K

NORTHERN CALIFORNIA AREA LARGE FIRES:

LUHI, Hawaii Volcanoes National Park. This fire is on the Island of Hawaii and was started by lava from the Kilauea Volcano. Minimal fire activity was observed in an Ohia rainforest. Volcanic gas conditions over the fire will determine where crews continue mopup operations. The change in acreage is due to more accurate mapping.

LUHI	HI	HVP	4,930	85	6/11	76	3	0	3	0	60K

EASTERN GREAT BASIN LARGE FIRES:

LONESOME BEAVER, Richfield Field Office, Bureau of Land Management. This fire is 18 miles southwest of Hanksville, UT. Active fire behavior was observed in pinyon pine, juniper, ponderosa pine and grass. The fire continues to be managed under a confine/contain strategy.

SILVER ZONE	NV	EKD	175	80	6/12	88	3	3	1	0	NR

OUTLOOK:

Weather Discussion: A westerly flow is spreading drier air into the Southwest. A disturbance will track across Montana and the Dakotas bringing scattered showers and thundershowers. A few thunderstorms are expected over the intermountain West. Showers are on tap for New England and over much of the Southeast states. In Alaska, a dry cold front will bring gusty winds and low humidity to the central and eastern interior. A low pressure system in the Bering Sea will continue to spread moisture into the southern and western sections of Alaska.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
EASTERN GREAT BASIN AREA Partly cloudy with widely scattered thundershowers central and northern Utah, otherwise mostly sunny and dry.	60-75 in the mountains, 75-90 in the valleys except 90-97 in the valleys of southern Utah and the Arizona Strip.	Idaho, western Wyoming, and southern Utah 9-25%. Central and northern Utah 14-30%.	West winds 5-15 mph.
NORTHERN CALIFORNIA Mostly sunny, becoming partly cloudy in the north and over higher terrain in p.m. hours, with a 10-20% chance of mountain thunderstorms. Low clouds and fog along the coast, well inland during the morning hours.	From upper 50s to near 70 near the coast and 70s to 80s inland.	15-25% east of the Sierra Cascade Crest and 28-43% west, except 55% or higher near the coast.	SW to WNW increasing to 7-15 mph in the afternoon, with locally higher gusts.
SOUTHERN CALIFORNIA Morning low clouds and fog to the lower coastal slopes with local drizzle, otherwise mostly sunny, except a slight chance of thunderstorms east of the Sierra crest.	65-80 Mountains and coastal basins, 80s central valley and upper deserts and 95-105 lower deserts.	20-35% Mountains and inland valleys 50-70% coastal valleys and lower coastal mountain slopes, and 10-20% deserts.	SW-NW 10-20 mph mountains, 15-25 mph deserts, and 5-15 mph elsewhere.
SOUTHWEST AREA Partly cloudy. Isolated thunderstorms western Texas.	70s and 80s mountains. 80s and 90s remaining lower elevations.	8-18%, except 20-28% west Texas.	SW 10-20 mph in southeast New Mexico and west Texas...5 to 15 mph elsewhere.

SAFENET

SAFENET is a form, and process, that provides a method for reporting unsafe situations on, or off, the fireline. The information provided on the form will help collect important, safety-related data to determine long-term trends and problem areas. A SAFENET may be filled out at any time to report a valid concern about unsafe situations in fire operations, as well as document corrective action.

- Discuss the methods for filing a SAFENET.
 - Electronically (Access site through NIFC web site)
 - By hardcopy (self-addressed, stamped forms available through the cache system).
 - By phone (1-800-670-3938)

- Discuss advantages of filing a SAFENET through your supervisor versus sending it yourself.
 - Increase the chances of finding an immediate solution.
 - Keeps supervisor "in the loop."

- Discuss using SAFENET in situations other than fire.
 - Prescribed fire
 - All-risk
 - Training

- Where does a SAFENET go, and what response can you expect?
 - SAFENETs are received and stored in a database in Boise. After a SAFENET is received, the names are removed. It is then given a document number and posted to the web.
 - Every new SAFENET is then forwarded to the affected agencies designated list of contacts, which usually includes the National or Regional Safety Officer.
 - It is each agency's responsibility to insure that corrective actions are taken.

- Corrective actions can be filed by anyone at any time. They are automatically attached to the individual SAFENET on the database.

- Discuss using SAFENET to monitor safety issues other firefighters may be having.
